

Pursuing a Better Investment Experience

Using 10 Investment Principles

Timothy Clifford CFP®

1. Embrace Market Pricing

The market is an effective, information-processing machine. Millions of participants buy and sell securities in the world markets every day, and the real-time information they bring helps set prices.

World Equity Trading in 2015

	Number of Trades	Dollar Volume
Daily Average	98.6 million	\$447.3 billion

2. Don't Try to Outguess the Market

The market's pricing power makes it difficult for investors who try to outsmart other participants through stock picking or market timing.

As evidence, only 17% of US equity mutual funds have survived and outperformed their benchmarks over the past 15 years.

US Equity Mutual Fund Performance

3. Resist Chasing Past Performance

Some investors select mutual funds based on past returns. However, funds that have outperformed in the past do not always persist as winners. Past performance alone provides little insight into a fund's ability to outperform in the future.

Do Outperforming US Equity Mutual Funds persist?

4. Let Markets Work for You

The financial markets have rewarded long-term investors. People expect a positive return on the capital they supply, and, historically, the equity and bond markets have provided growth of wealth that has more than offset inflation.

5. Consider the Drivers of Returns

Academic research has identified these equity and fixed income dimensions, which point to differences in expected returns.

These dimensions are pervasive, persistent, and robust and can be pursued in cost-effective portfolios.

Dimensions of Expected Returns

Market Equity premium— stocks vs. bonds	Profitability² Profitability premium—high vs. low profitability companies
Company Size Small cap premium— small vs. large companies	Term Term premium—longer vs. shorter maturity bonds
Relative Price¹ Value premium— value vs. growth companies	Credit Credit premium—lower vs. higher credit quality bonds

6. Practice Smart Diversification

Diversification helps reduce risks that have no expected return, but diversifying within your home market is not enough. Global diversification can broaden your investment universe.

Home Market Index Portfolio

S&P 500
1 country, 500 stocks

Global Market Index Portfolio

MSCI All Country World Index (IMI)
46 countries, 8,716 stocks

7. Avoid Market Timing

You never know which market segments will outperform from year to year. By holding a globally diversified portfolio, investors are well positioned to capture returns wherever they occur.

Annual Returns by Market Index

8. Manage Your Emotions

Many people struggle to separate their emotions from investing. Markets go up and down. Reacting to current market conditions may lead to making poor investment decisions at the worst times.

9. Look beyond the Headlines

Daily market news and commentary can challenge your investment discipline. Some messages stir anxiety about the future while others tempt you to chase the latest investment fad.

When tested, consider the source and maintain a long-term perspective.

10. Focus On What You Can Control

A financial advisor can create a plan tailored to your personal financial needs while helping you focus on actions that add value.

This can lead to a better investment experience.

Exhibit 1: In US dollars. Global electronic order book (largest 50 exchanges). Source: World Federation of Exchanges.

Exhibit 2: Beginning sample includes US equity mutual funds as of the beginning of the 15-year period ending December 31, 2015.

Survivors are funds that were still in existence as of December 31, 2015. Non-survivors include funds that were either liquidated or merged. Outperformers are funds that survived and beat their respective benchmarks over the period.

Exhibit 3: The graph shows the proportion of US equity mutual funds that outperformed and underperformed their respective benchmarks (i.e., winners and losers) during the initial 10-year period ending December 31, 2010. Winning funds were reevaluated in the subsequent five-year period from 2011 through 2015, with the graph showing winners (outperformers) and losers (underperformers). Fund count and percentages may not correspond due to rounding. Data Source (Exhibits 2 and 3): Analysis conducted by Dimensional Fund Advisors using data on US-domiciled mutual funds obtained from the CRSP Survivor-Bias-Free US Mutual Fund Database, provided by the Center for Research in Security Prices, University of Chicago. Sample excludes index funds. Benchmark data provided by MSCI, Russell, and S&P. MSCI data © MSCI 2016, all rights reserved. Russell data © Russell Investment Group 1995–2016, all rights reserved. The S&P data are provided by Standard & Poor's Index Services Group. Benchmark indices are not available for direct investment. Their performance does not reflect the expenses associated with the management of an actual portfolio. Mutual fund investment values will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Diversification neither assures a profit nor guarantees against a loss in a declining market.
